

Due to the unfortunate circumstances with the laptop and race software, the calculations for the standings were done manually at the event to be able to provide winners in the Primary, Youth, and Adult categories.

For the software to calculate the winners and display them, I entered times of 2.51 for first place, 2.52 for second, and so on up to 2.56 for 6th place.

The software drops your lowest time, so a racer with 5 1st places and one 2nd place would have the same score as someone with 6 1st place races.

The individual stat sheets are correct in the placing, but not in the actual times.

Thanks for your understanding.
